

Polymers for Enhanced Oil Recovery

For several years Clwyd have been working as a partner in the above project, run by MERL (Materials Engineering Research Laboratory, based in Hitchin), together with other material specialists, tool and seal makers.

This work has now come to fruition, and [Mike Winrow](#) presented a paper at the High Performance Elastomers & Polymers for Oil and Gas Conference organised by Smithers Rapra Technology Ltd in April 2010. This illustrates, using case studies, how compounds can be developed for use in these demanding environments. Mike's paper can be accessed under the technical papers section of this website.

June 2010
